ASN Biodiversiteitsfonds

Fund profile

The objective of the ASN Biodiversiteitsfonds is to contribute to the retention, protection and restoration of biodiversity, by investing globally in projects and private and listed equity. The Fund focuses on four sectors: sustainable forestry, sustainable agroforestry, sustainable oceans and fisheries and ecotourism. At the same time, the ASN Biodiversiteitsfonds supports new 'green' employment that does not harm nature and contributes to local prosperity. The financial objective of the ASN Biodiversiteitsfonds combines long-term capital growth with a moderate dividend return. The Fund aims to offer investors the best realistically possible financial return with a sustainability benefit: the protection and restoration of biodiversity. This is measured as the total area (in hectares) in which biodiversity is restored with a healthy ecological balance.

Every quarter we post [here](#) on our website an explanation of the portfolio returns, an update on portfolio changes and market developments as

The Fund's sustainable investment objective:

- to protect, restore and improve biodiversity (expressed in hectares of protected and restored areas on land and at sea).

Sustainable policy

The ASN Biodiversiteitsfonds carefully selects from funds, projects and listed companies. Our selection procedure consists of two steps: 1) In the first step, projects, funds and companies are extensively assessed on the basis of sustainability criteria and their positive impact on biodiversity. 2) The second step consists of a financial assessment. All investments additionally have to meet the ASN Sustainability Criteria and deliver a measurable contribution to biodiversity and one or more of the following UN Sustainable Development Goals (SDGs): Climate action (13), Life below water (14), Life on land (15) and Decent work and economic growth (8). All projects and companies are assessed on criteria relevant to the sectors of sustainable forestry, sustainable agroforestry, sustainable oceans and fisheries and ecotourism. These criteria concern (among others): 1) the quality of the business model and the management, 2) the size of the project, 3) the expected positive contribution to biodiversity and 4) the prosperity of the local population. This methodology is standardised and developed by the Partnership Biodiversity Accounting Financials (PBAF). ASN Impact Investors analyses lead to a recommendation to the Investment Committee of ASN Impact Investors, which will approve or reject proposed investments for inclusion in the Fund's investment universe.
